

Elias Nobari

Professional

-I Graduated from Amirkabir University of Technology in 2013 and two years earlier (2011), I got my bachelor degree from KhajeNasir University of Technology. Industrial Engineering was my major field of study during the course of my education in both BA and MA.

-My previous work experiences include Business Process Analyst in Exxon Company. During that time, I was in charge of designing and analyzing different business processes in the foreign trading field.

-I am interested in a wide range of work fields especially those have interactions with my field of study but what really intrigues me is the Implementation of different management systems like that of Quality Management, Project Management, Risk Management and Business Process Management. I love my job mainly because this occupation needs to expose myself to different people and processes and the chances will increase to learn different things from them.

-It would be definitely my pleasure to state that I am currently joined Persol as a Business Process Specialist in Planning & Systems Department and I wish to be able to create benefits to Persol business processes.

-I was born and brought up in Iran, Tehran, but I am originally from northwest of Iran, Tabriz.

-I found myself as a patriotic person and I care about my country. I hope one day my dreams come true and my country be able to reach the highest possible levels of different powers in the world and plays a significant role in the region. I wish to be able to have even small roles in regard with this achievable paradigm shift.

Personal

-I am passionate about working in my field of work in an international level and not very irrelevantly, my perfect travels would be business travels to experience new professional environments that consequently will lead to broadened horizons, improved skills and maybe deeper knowledge.

-Swimming, watching TV shows, following news, reading English books as well as white papers relevant to my field of work, are all the activities that I do in my leisure time.
